EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kent Stone (Reg. No. 31,883) on 10 September 2004.

The application has been amended as follows:

IN THE CLAIMS:

In claim 1, line 6, --sufficiently shaped to allow radial movement-- has been inserted after "trough".

In claim 2, line 6, --, wherein said spherical trough is sufficiently shaped to allow radial movement-- has been inserted after "radius".

EXAMINER'S REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant application is directed towards a method and device for dynamically absorbing resonant vibration of a rotating component of a turbomachine. This device and method includes having a cavity with walls and having a spherical trough sufficiently shaped to allow radial movement within the rotating component of the turbomachine for a ball placed within the cavity.

Art Unit: 3745

While the cited prior art reference Darrieus ('243) does disclose a vibration absorbing device having a spherical trough, the trough of Darrieus does not allow for radial movement of the ball in the cavity. Particularly the trough of Darrieus only allows circumferential movement of the ball with the cavity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
